PROFILE

Results-oriented **Front End Developer** with 3 years of experience in developing and enhancing web applications using the MERN stack. I have worked globally, with **experience in India and the Gulf region**. I am skilled in creating interactive, responsive user interfaces and designing robust backend architectures. I have a proven track record of effective team **collaboration, mentoring junior developers, and delivering scalable, high-performance solutions**. **Currently based in Dubai**, I am committed to continuous learning and making impactful contributions.

PROFESSIONAL EXPERIENCE

Matt Engineering Solutions, Front-End Developer
January 2022 – July 2024 | India

- **Led the development of responsive web applications** using **React and Next.js**, ensuring **cross-device compatibility** and seamless user experiences.
- Collaborated closely with UI/UX designers to **translate Figma designs into pixel-perfect, interactive interfaces.**
- **Developed** and **integrated RESTful APIs** using Node.js and Express, enhancing backend logic and database structures to increase scalability and system efficiency.
- Worked within **agile frameworks**, participating in sprint planning, daily stand-ups, and review sessions to ensure the timely delivery of high-quality software solutions.
- **Optimized** key processes to **improve code performance, reducing initial page** load times by **30%** and significantly **enhancing the overall user experience.**
- Used **Git for version control** and contributed to application **deployment on AWS**, enhancing a robust and scalable cloud infrastructure.
- Conducted comprehensive **peer code reviews** and participated in **technical discussions**, enhancing continuous improvements in code quality and performance optimization.

PROJECTS

Health Management Application for Diabetic Patients

- Developed a **health management platform** using **Next.js 13, Redux Toolkit, Prisma, PostgreSQL, Material-UI, and Firebase**, featuring user authentication, TTM assessment, and real-time health tracking.
- Optimized and deployed a **GPT-powered chatbot** for personalized user support, boosting user engagement and improving customer experience.
- Implemented a **social community feature** for user connections and engagement through posts, likes, and comments, enhancing **community interaction** and patient support.
- •Integrated and optimized **RESTful APIs** for efficient data flow between frontend and backend systems, ensuring **scalability** and **high performance** through rigorous testing and **optimization**.
